

# Photography is Magic!

## **Day 1:**

The Photography Club of IMSciences arranged a two-day workshop to train aspiring photographers and photography enthusiasts the basics of photography. The instructor and trainer, Mr. Laiq Ahmad informed participants about the three pillars of photography, namely; ISO, shutter speed and aperture. Other than that the participants were informed about the basic principles of photography and the art of taking a good, professional picture.

## **Day 2:**

Today, Mr. Laiq Ahmad reviewed the previous day's lessons and performed practical examples of taking a good, professional picture. The participants were asked to present three photographs each which they had taken by themselves. He pointed out areas of improvements in each picture and showed the participants how to improve their work.
